More than 650 employees in the Bodet Group offer you support every step of the way

With Bodet Sport, you can equip your sports facilities with the latest innovations

LED screens have become important in arenas, sports halls and stadiums. They intensify sporting events and provide spectators with a unique experience: live broadcast and highlights of the game and zooming in on players.

LED video displays solutions are excellent tools that strengthen the impact of advertising.

The sale of advertising space to your partners enables you to have a return on investment from your LED video solution very quickly. The advertising capacity of dynamic displays is 40 times greater than static displays. As a result, your equipment can quickly become a source of revenue!

Why choose Bodet Sport for your LED video display?

For over forty years, Bodet Sport has been designing and manufacturing sports scoreboards and LED video display solutions. When you choose a Bodet Sport solution, you are guaranteed to benefit from durable and reliable solution.

In addition, our range of LED video display is a complete solution integrating both hardware and software.

Discover our LED video sport display product range:

INDOOR VIDEO DISPLAY

For halls, arenas and gymnasiums, Bodet Sport offers a complete line of products for LED video display: LED screen, video cube, LED perimeter display, scoreboards with LED screen.

INDOOR LED SCREEN

LED screens are made up of several modules joined together in order to build giant screen. You can display various types of information in real time: scores, adverts, the live game, replays and animations.

FEATURES

- Technology: SMD LED
- Screen Resolution: P6, P8 and P10mm

ADVANTAGES

- Customisable screen size
- Front and rear access LED module

INDOOR LED PERIMETER DISPLAY

In halls and stadiums, LED perimeter displays have become vital when it comes to broadcasting sponsors and adverts. This equipment offers new revenue opportunities.

FEATURES

- Technology: SMD LED
- Screen Resolution: P10mm

ADVANTAGES

- Protective foam padding
- Easy to transport and to install

VIDEO CUBE

The video cube consists of four LED screens held by a metal structure. This equipment is very impressive and is popular to audience.

OUTDOOR VIDEO DISPLAY

As well as specialising in sport display units, we also provide a range of LED video display for stadiums: Giant LED screen and LED perimeter display.

OUTDOOR LED SCREEN

Designed and manufactured for outdoor use, our range of LED screens offers different resolutions to meet the different needs of stadiums.

FEATURES

- Technology: DIP LED
- Screen Resolution: P10, P16 et P20mm

ADVANTAGES

- Customisable screen size
- Resistant to harsh weather conditions

OUTDOOR LED PERIMETER DISPLAY

Our outdoor LED perimeter displays have an IP65 waterproof rating. This means they are built to withstand all weather conditions. LED perimeter displays are made of several modules so they can be simply joined to create any length.

FEATURES

- Technology: DIP LED
- Screen Resolution: P16 et P20mm

ADVANTAGES

- High level of brightness
- Modular display

INDOOR SPORTS DISPLAY

INDOOR SCOREBOARD

For over 40 years, Bodet Sport has been designing and manufacturing a wide range of scoreboards for most sporting activities: basketball, handball, rugby, football, volleyball, ice hockey, water polo and running events.

Our range of LED video display is compatible with our traditional indoor and outdoor scoreboards thanks to VideoSport, a software specially developed for managing scoring and game information such as fouls and timing.

VideoSport also lets you display animated gifs, player presentations and advertisements.

INDOOR SCOREBOARD WITH LED SCREEN

To show your partners advertisement during sport events we have developed scoreboards equipped with a LED screen.

As the attention of spectators is captivated by the scoreboard, the LED screen placed on the centre of the scoreboard, guarantees an increased impact of the advertisement.

OUTDOOR SPORTS DISPLAY

Our range of LED video solutions is compatible with our scoreboards and is built for external use.

OUTDOOR SCOREBOARDS

Scoreboards from our BT2000 range will enable you to add an OUTDOOR LED video screen to make your sports display more dynamic.

BT 2045 Alpha

OUTDOOR SCOREBOARDS WITH LED SCREEN

Your LED screen will enable you to display scores, adverts and animations triggered by specific events in real time such as goals, yellow cards, red cards.

Scoreboard with LED screen

DISPLAY CONTROL

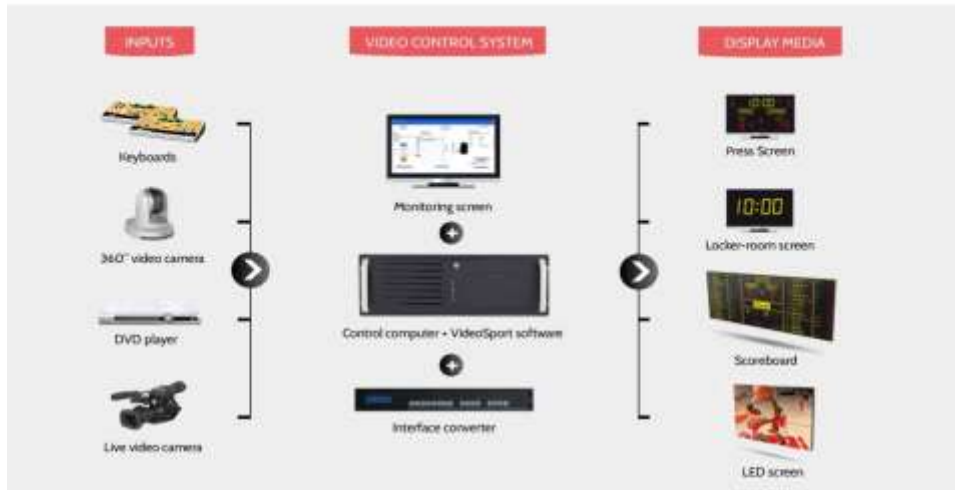

VIDEO CONTROL SYSTEM

The video control system is a hardware solution to import your various sources of video (video inputs) and set the parameters of your display media.

Its use is intended for:

- Managing several display media (screen, scoreboard, video cube, etc.)
- Broadcasting pre-recorded or live videos.
- Launching animations.
- Displaying scores
- Controlling the brightness and contrast of the video.

We work with the leading manufacturers of video processing equipment (Kramer, Tricaster) and our engineering department is here to assist you in working out the solution that meets your needs.

DISPLAY MANAGEMENT

VIDEOSPORT SOFTWARE

VIDEOSPORT FOR SPORT DISPLAY MANAGEMENT

VideoSport, a software application developed by Bodel Sport, displays scores and game information such as fouls and timer on its LED video solutions: LED screen, video cube. It also lets you display animated gifs, player presentations and sponsors' commercials.

Our software complies with the regulations of sports federations and is certified by FIBA.

VideoSport simultaneously manages our scoreboards and our LED video solutions. For large halls such as arenas, the software also communicates with the various screens across the site such as those in sports halls, press reception areas, VIP areas and locker rooms.

VIDEOMEDIA FOR ADVERTISING DISPLAY MANAGEMENT

To complement the VideoSport software application, Bodel Sport has designed VideoMedia software, which displays multimedia content (videos, images, logos) and partners' commercials.

With VideoMedia, you can customise the display of each display equipment (LED screen, perimeter displays) according to the major events of a game including the beginning of the game, timeouts, half time, fouls, throw ins, goals, penalties and 3 point field goals.

VideoMedia provides to the partners the ability to track the exact times when a commercial has been broadcasted and a record of the number of times spectators have been exposed to it.

Show your passion for sport

From the smallest to the biggest project, Bodet Sport is by your side every step of the way. We strive for perfection in our product range to ensure you are offered the highest level of quality and technology available.

Innovations in all Sports

Research and development

All our LED video solutions are designed with advanced materials:

- High luminosity SMD LED or through-hole LED display.
- Shock resistant (compliance with DIN standard)
- Excellent resolution
- Compliance with European directives.
- FIBA approval.

Always offering you more

As a partner of numerous sport federations, Bodet Sport teams up with experts in their field to offer you high performance sport display solutions adapted to your needs.

Always involved

Bodet Sport is actively involved in major sporting events in France and around the world so you can benefit from the technologies of high performance sport:

- French championship.
- Harlem Globe Trotters.
- All Star Game Basketball.
- NBA TOUR.
- FIBA Women's World Championship Thailand.
- Women's European Basketball Championship Hungary.
- Final of the Basketball French Cup.
- Final Four LNB (Ligue Nationale de Basketball).
- Beach Soccer World Championship.
- Men and Women European Basketball Championship.
